EDUCATION

FullStack Developer
SoyHenry's bootamp
20021 - 20022

LANGUAGES

English - b1 certificate

Spanish - Native

SKILLS

- React
- Next
- Vue
- Nuxt
- Astro
- Svelte
- Svelte
- NodeJs
- Javascript
- Typescrip
- Tailwind
- Rust

WORK EXPERIENCE

FRONTEND DEVELOPER   Nov. 2023 - Present
LIQUID
- I develop web applications using Vue, Nuxt, Pinia, and Tailwind CSS, with deployments on GCP (Google Cloud Platform).
- I collaborate with the design team to improve the workflow and user experience.

MOBILE DEVELOPER   Jun. 2023 - Aug. 2023
MATCHING
- Internship, focused on a mobile application developed in React Native and an application website using React.
- I developed some app screens, such as user profile and sport information.

FRONTEND DEVELOPER   Jun. 2022 - Aug. 2022
KIMCHE
- I added new features to the web applications, considering data visualization (tables, graphics, and progress bars).
- I identify and resolve problems, improving functioanality and user experience.
- I used technologies like React, React Context and Cubejs.

PERSONAL PROJECTS

QUIPP
- Quipp is a website for interacting with other people, similar to a community. It is used for QA streams and gives the possibility to create a section or topic where any person can leave their comments.
- It was developed using Next.js, Supabase, and Rust.

MELODY
- Melody is a music player built for the terminal (TUI). It allows users to play and manage lists of songs based on their audio folder
- It offers fast navigation using keybindings.
- Melody was developed with Rust.
